Led Fintech Merchandise Project (12 stakeholders, compliance & logistics).
Promoted at Delivery Hero; received
“Outstanding” rating.
Rolled out a new process at QUT, adopted
across offices.
Directed office renovation project at
Caxton Legal Centre.

About

I bring 12+ years of professional experience, including 4 years in the tech industry and 3 years in fintech, with expertise in operations, project management, and executive support. Having recently completed a five-month full-time Data Analytics program with CareerFoundry, I gained hands-on experience with SQL, Python, Tableau, and Excel. I also hold certifications in SQL, Tableau, and Python, as well as an IBM Data Analytics course. Passionate about continuous learning, I have a proven track record of streamlining workflows and improving operational efficiency, with a growing focus on applying data-driven insights to support decision-making.

Education

Data Analytics Program (Introduction + Immersion)

CareerFoundry, Berlin, Germany, August 2025.

B.A. Media & Communication

Queensland University of Technology, Brisbane, Australia.

Introduction to Data Analytics Certificate

IBM, Online.

Certificate III in Business

Martin College, Brisbane, Australia.

Projects

Rockbuster Stealth - SQL Business Analysis.

Goal: Support Rockbuster’s transition from DVD rentals to streaming by identifying revenue drivers and expansion markets.
Process: Queried and joined the customer, rental, and payment tables in PostgreSQL. Used CTEs, subqueries, and aggregations to analyze customer value, rental duration, and film category performance.
Outcome: Recommended first-wave streaming markets (India, China, U.S.) and profitable catalog focus (Sports, Sci-Fi, Animation).
Tools: SQL (PostgreSQL), Excel, PowerPoint | GitHub:
github.com/ZosyaTrimbacher/RockbusterStealth

Instacart - Python Customer Segmentation.

Goal: Help Instacart improve marketing strategies through customer segmentation and behavioral analysis.
Process: Cleaned and merged 3M+ rows using pandas; created new features (loyalty and spend flags). Segmented users into profiles (families, singles, high/low spenders) and analyzed order timing and product preferences.
Outcome: Delivered actionable insights for ad scheduling, retention campaigns, and promotions in Produce, Dairy, and Snacks.
Tools: Python (pandas, NumPy, matplotlib, seaborn), Jupyter Notebook | GitHub: github.com/ZosyaTrimbacher/Instacart

Influenza Season - Tableau + Statistics

Goal: Anticipate U.S. hospital staffing needs during the influenza season to prevent under- or over-staffing.
Process: Merged CDC influenza mortality data with Census demographics. Ran descriptive statistics and a one-tailed t-test confirming elderly risk. Grouped states into vulnerability tiers and built Tableau dashboards showing seasonality and hotspots.
Outcome: Recommended surge staffing in California, New York, and Texas during Dec–Feb and proactive planning in senior-heavy states.
Tools: Tableau, Excel, Python |
